

Safety in Home by Year 3

Always lock your doors and ensure at night that your windows are not open wide enough.

Make sure all gas appliances are turned off when not in use.

Always turn the cooker off after use.

Keep chemical products and medicines out of the reach of children or have safety locks on cupboards.

Turn off electrical equipment when they are not in use. It is safer and also kinder to the environment.

Water and electricity do not mix. Always dry your hands before using any electrical equipment and never take them into the bathroom. You can get an electric shock.

Do not overload electric sockets with lots of electrical devices as it is a fire risk.

Keep ovens clean as they could be a fire risk.

Do not leave clothes or toys on the floor because they can obstruct your exit in an emergency.

Wet floors can cause accidents. Keep them dry at all times.
