

1. Find a Safe Place to Cross the Road

- We will stop and wait before we cross any roads and we will try to cross at traffic lights and zebra crossings using **'STOP, LOOK, LISTEN, THINK.'**
- We will look and check that vehicles have stopped and when we see the green man before we cross safely.
- We will find a safe place to cross, especially when it is too dark or sunny, where all road users can see us and we can see and listen for the traffic.

Road Safety

Created by Year 3

5. Look and Listen While You Cross

- We will cross the road when it is safe to do so using: **'STOP, LOOK, LISTEN, THINK.'**
- When we cross the road, we are going to choose to walk instead of running because we are less likely to fall over and get hurt by a car.
- We will keep looking and listening as we safely cross the road

2. Stop and Look around

- We will stop and stand on the pavement when we are ready to cross.
- We will stand back from the kerb and that cars can see us and we will not get hurt.
- We will look left then right then left again before we cross a road, so that we know that no cars are coming.

4. Do Not Cross Until it is Safe

- We will not cross the road until there is a safe gap and we have enough time to reach the other side of the road.
- We will not cross the road without an adult or our school partner and make sure that we are holding hand as we cross the road.

3. Look and Listen for Traffic

- We will always use our eyes and ears to look and listen for traffic before we know to safely cross the road.
- Remember, we can often hear traffic coming before we can see it!
- To make sure that we can see any dangers around us, we will not look at our phones, tablets or anything else that might distract us from our surroundings.
