

♥ Thank You! Thank You for spending those six days to create your most beautiful creation! Thank You, my Lord, for making Earth so precious and sacred.

I thank You for brother Sun and Sister Moon. They shine their radiant light to show us the path of You and Jesus.

O blessed and glorious God! I love all the beautiful creatures you have made to live here. So, my Lord, please teach me how to properly take care of them.

You made it so that everything in life has a purpose. So please, my Lord, help others care for everything too.
Thank You ♥

Nature is our home, a reflection
of God,

It is up to us humans to keep it
or not.

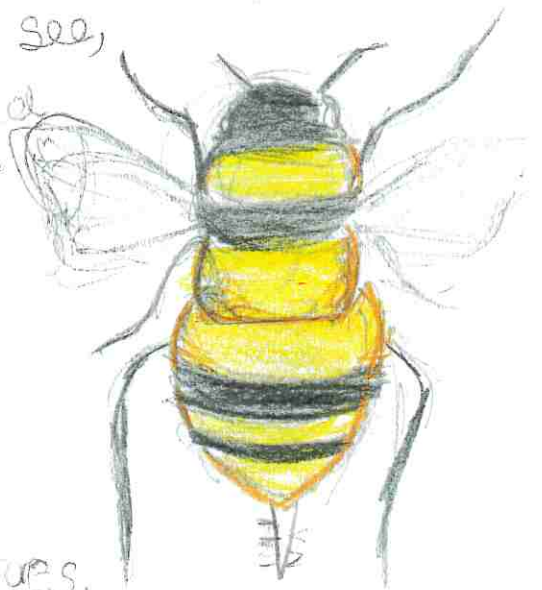

Brother Sun and Sister Moon,
Shines when the night comes
soon.

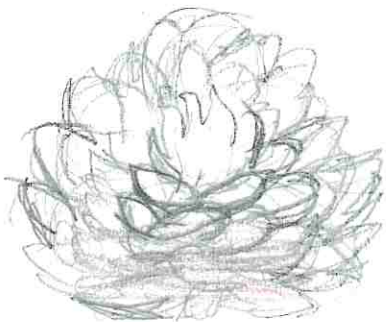

Thankful, I am for all I see,
Like all the tall grass and
the buzzing bumblebee.

We adore each thing,
Flourishing its own beauty,

Even the night owl that
goes "HOOT HOOTY!"

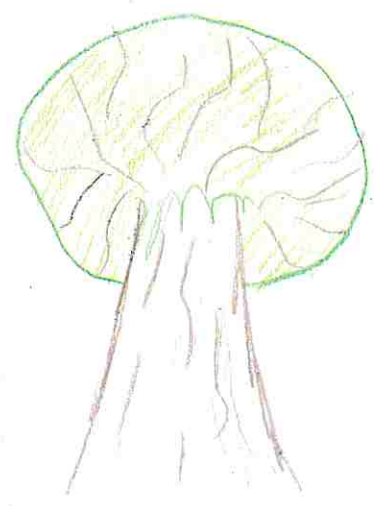

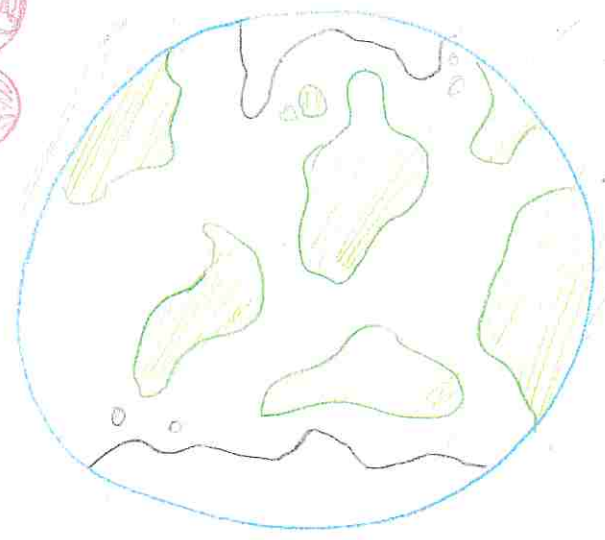

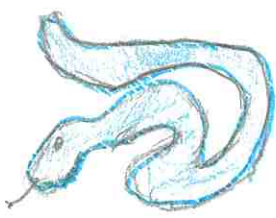

The Earth is beautiful,
with all its amazing creatures,
But we must give it a promise
to keep these creatures.

OUR EARTH

Brother Sun, powerful and strong,
His rays shining clear and long,
Sister Moon, who comes out at night,
Providing light and shining bright,
Our brothers and sisters, the animals live,
In peace and harmony, flourish with,
The Earth, our home, God's gift to us,
Mother Nature, keeping the forests lush,
Brother Fire, dancing into the night,
Cooks our food and sustains our lives,
Sister Water, light and free,
Yet humble and wise as a bee,
Brother Wind, Brother Air,
Both invisible, yet the importance shares,
We thank and praise God for our common home,
Earth, our planet, Laudato Si.

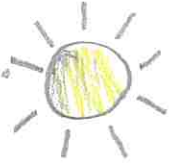

Dear Son Of God,

The stars shine so bright,
giving us a day that is so light.

Brother sun and Sister moon,
You give us happiness instead of gloom.

Dogs and frogs have a life to,
so this is what St Francis wants us to do.
He wants us to care and share,
Just so that this life is fair.

Insects crawl on the muddy land,
Whilst we give them a helping hand.
Help everyone says the law,
A struggling tiger is what I saw.

The birds flap their wings in the sky,
Whilst us humans watch them fly.
The birds look down below,
Just seeing the grass grow.

Sister fire keeps us warm,
Whilst the sun gets hit by a storm.
We are happy with what you gave us,
so that is why we make no fuss.
